i) Economics is the central problem. It describes the relationship between scarce resources and unlimited wants.

ii) mixed economy is an economy which has both capitalist and socialist economy but doesn't have the demerits of both of eg- India

iii) It is that any firm can make any product at any price and the government has no say in that.

iv) It comes under the ^{Personal consumption} consumer branch. It spends money on group and the people do not get the same amounts.

v) It is the ^{increase} income in national income or per capita income

vi) China, Vietnam

vii) Amit Shah

viii) high Per capita income
developed infrastructure

ix) Because the government controls everything for example in price ~~and~~ they also produce several goods and services.

x) Adam Smith. "The inquiry of nature and the causes of wealth of nations".

xi) It means that one resource does not have to do only one thing, it can have other uses. For eg- high electricity can be used for a bulb and a TV.

xii) It is unlimited because any day a new invention can happen and everyone starts using that. **Be specific**

xiii) There is no competition because everything is run by a government and producers do not have right of free enterprise.

xiv) when no private sector is willing to invest in it.
